SUMMARY

Informatics Engineering graduate with experience in web-based information system development, business process analysis, database management, and operational data processing through academic projects and internship experience. Skilled in analyzing manual work processes and developing web-based systems that support inventory management, transaction processing, and reporting. Experienced with Microsoft Office, process flow diagrams, and technical documentation. Analytical, detail-oriented, and organized, with a commitment to continuously developing technical competencies.

EDUCATION

Dian Nuswantoro University — Semarang, Indonesia
Bachelor of Science in Informatics Engineering Sept 2022 – Feb 2026
GPA: 3.32 / 4.00

INTERNSHIP EXPERIENCE

IT Intern – PT Jasa Raharja (Persero) Branch Semarang Jul 21 - Aug 29, 2025
Building and Room Rental Information System (Laravel, Tailwind CSS, MySQL)

- Analyzed manual building and room rental processes and documented system requirements and process flows.
- Developed a web-based rental information system with features for room data management, transaction verification, and rental reporting.
- Coordinated with staff to gather operational requirements.

PROJECTS

Web-Based LPG Sales Management Information System (Final Project) | https://lpgku.my.id/
Tech Stack: Laravel | PHP | MySQL | Waterfall

- Analyzed LPG sales business processes and developed a web-based information system covering inventory, sales transactions, stock monitoring, and daily reporting.
- Implemented real-time stock monitoring and payment status notifications to improve data visibility and transaction management.
- Prepared system documentation including software requirements specification (SRS), design diagrams (flowchart, ERD, UML), and conducted black box testing to ensure system reliability.

Appointment Scheduling System (April – June 2025)
Tech Stack: Laravel, MySQL

- Developed a web-based appointment scheduling system using Laravel to improve healthcare service management.
- Analyzed scheduling processes and designed features for patient registration, appointment management, and staff availability.

TECHNICAL SKILLS

System Analysis & Documentation

- Business Process Analysis
- System & Requirements Analysis
- Process Modeling (Flowchart)
- Data Modeling
- SDLC
- Software Testing
- Technical Documentation

Software & Tools

- Microsoft Office (Word, Excel, PowerPoint, Access)
- Google Workspace (Docs, Sheets, Slides, Forms)
- Microsoft Visio
- Draw.io
- Figma

Application Development

- PHP
- Laravel
- JavaScript
- HTML/CSS
- Tailwind CSS
- MySQL/SQL
- Git/GitHub

Data & Reporting

- Data Analysis
- Power BI

SOFT SKILLS

- Problem Solving
- Analytical Thinking
- Discipline
- Time Management
- Communication
- Teamwork
- Adaptability
- Attention to Detail
